TAMSIZE S 200

(Acrylic size)

Since the textile machinery develops rapidly, the use of size of high quality is unavoidably needed to prevent the yarn from breakage and this improve the efficiency

Tamsize S -200 is applicable to cotton,blend of polyester,nylon ,rayon and viscose rayon.it is a binder based on good film-forming property.when it is used in combination with starch and K-300 an excellent size solution can be obtained.the adhesion property is improved and the maximum rate of sizing will be achieved.

Apperance : Colorless,transarent viscous liquid
Active content : 25%-30%

The warp yarn processed with Tamsize S-200 gives excellent handle,softness and smoothness.it can easily separated from the drying zone of sizing machine and this eliminate difficulties usually encountered such as double end,cross end.

The procedure of application of TAMISZE S -200 is the same as that of other sizing materials.
